

# FOR ASSAY AND REFINING

# Bank on ARGEN

*The name you know and trust.*

*P*reviously we had to purchase various alloys from different suppliers. We now buy all our alloys from Argen with great success. In addition, being able to rely on our supplier for refining needs has been a bonus. We are very pleased with Argen's refining services. We have consistently received quick assay results and dependable metal returns on our lots. In comparing Argen with other refiners we have used, I have found Argen to be very competitive in terms of assay returns and costs.

*I* want to take this opportunity to thank Argen for the excellent, efficient and professional manner in which our gold scraps return was handled. I cannot believe my return. It was 50% greater than the previous years when we had not sent our refining to Argen. I cannot even begin to speculate what I could have saved. We look forward to many years of doing business with Argen.

Lonnie Frangadakis  
California Dental Arts, LLC

*W*e have been very pleased by the turnaround of our Platinum sweeps and scraps. As always, we are price sensitive and you have proven time and time again that you are more than competitive within the industry. We have enjoyed a steady growth of our Platinum business this year thanks to Argen's just-in-time supply of product. We really appreciate doing business with you.
