More economical than high palladium alloys!

The Original 65SF

The most compatible white high-noble silver-free gold alloy on the market!

- Compatible with almost every porcelain including *Finesse™, *Ceramco® II, *Vita® Omega, *Vita® VMK®95, *Vita® Omega 900, *Shofu® Vintage® and *Shofu® Vintage® Halo® porcelains
- 65% Gold, 26% Palladium
- Superior physical properties make the alloy ideal for implants as well as short and long-span bridgework
- Silver-free composition eliminates any concern of porcelain discoloration
- The high gold content assures easy casting, soldering and finishing
- High melting range for exceptional sag resistance
- Micro-fine grain size provides superior marginal integrity
- High-noble classification provides your dentists with a higher monetary reimbursement over palladium alloys
