

**Palladium-
Silver Alloys**
from the
**Proven
Leader!**

The strongest,
most reliable
PALLADIUM-Silver
alloys on the
market today!

ARGELITE 55

- Used for medium and high expansion, conventional porcelains
- Has one of the highest yield and tensile strengths
- Superior physical properties
- Easy casting, soldering and finishing
- Micro-fine grain size provides superior marginal integrity

COMPOSITION:

55.0 Pd

34.0 Ag

ARGELITE 61

- Compatible with most porcelains
- Has one of the highest yield and tensile strengths
- Superior physical properties
- Easy casting, soldering and finishing
- Micro-fine grain size provides superior marginal integrity

COMPOSITION:

61.0 Pd

28.0 Ag
