ARGEDENT 65SF

The most compatible white high noble, silver-free gold alloy on the market! Compatible with virtually every regular-fusing porcelain and strong enough for any application.

Authentic® 86

Press-To-Metal™ A unique alloy enabling all-ceramic esthetics on bridgework. 360° porcelain margins are created by pressing the porcelain to the alloy.

GOLDTECH BIO 2000®

99.7% gold PFM alloy with unsurpassed biocompatibility. Comparable esthetics to all-ceramic restorations with the reliability and strength of a PFM.

HIGH PURITY 77

A superior inlay gold that is easily burnished, but will not distort under mastication stresses.

ARGEDENT 52

A trusted high noble alloy with over 30 years of clinical history. Can be used for all restorations including high stress applications.

EDUCATION CENTER

Committed to providing continuing education to the dental industry. Providing seminars and workshops by renowned dentists and technicians. Please call 800-375-9077 for more information

Unsurpassed in research, experience, innovation, quality and service.

As international leaders in the dental industry for over 40 years, Argen provides a wide array of products and services, meeting today's demands of esthetics, functionality and economy.
